ARCSTONE

PRODUCT AND MANUFACTURING PROCESS CONFIGURATION

Maximize your productivity by digitalizing your workflow

With Arcstone's Product and Manufacturing Process Configuration modules, get a head start on manufacturing digitalization by streamlining the heavy manual-based production processes to the fully automated ones. Significantly reduce time spent on deployment to rapidly optimize productivity and product traceability. Access all these features remotely via server, cloud, mobile, tablet or desktop.

Key Capabilities

Digital Workflow Builder

Automates facility wide workflow creation and management allowing for real-time monitoring of personnel, resources and equipment. Includes the creation of daily work orders, instructions, resources, checklists, etc. Update your workflow at anytime.

Additional Features

Attach any files such as instructions or technical drawings of components/materials used in each process. Specify type of equipment/tools, personnel, instructions that are required for each step. Block certain equipment/personnel from being by tool/personnel qualification.

Workstation Control

Monitor and collect production data including step timing, QC, resources and personnel tracking in real-time through any browser-based devices

Planning and Scheduling

Incorporate all of your scheduling, workflow creation and resources allocation into a single platform that optimizes your schedule to meet your business objectives

Integration with ERP & Third-Party Systems

Arcstone's Arc.link enables integration with most ERP systems (SAP, Oracle, Dynamics, etc) and other third-party systems (including other MES, LIMS, WMS, BI, CAD, etc)
